

PRESS RELEASE

distinctive...attentive...dedicated

Seychelles' newest DMC – **select-seychelles** – makes its international debut at the World Travel Market 2007

select-seychelles incorporation was inspired by a desire to create a destination management company providing a professional and discreet service that maintains intimate contact with the specific needs of its partners in order to provide superior service delivery.

The new company offers a wide range of services which includes hotel, airline, helicopter and boat bookings, luxury private and coach transfers as well as unique excursions and innovative, tailor-made discovery tours with a distinctly authentic flair.

As well as operating within traditional market areas, **select-seychelles** plans to exploit new ones showing potential for Seychelles' burgeoning tourism industry.

select-seychelles is supported by an experienced team of tourism professionals with expert knowledge of the extraordinary diversity of the islands. It seeks to make anticipation of, and focused attention upon, optimum service delivery complemented by sensitive, diligent follow-through, its number one priority in ensuring customer satisfaction.

Mr. Freddy Karkaria, the company's managing director explains his desire "to offer discreet, intimate and professional service to clients that will accord seamlessly with the expectations of our partner tour operators and travel organisers, reflecting their own high standards and company ethos in such a way as to become a virtual franchise. We shall also take pains to ensure that the same accommodating and flexible attitude will be extended to our local trade associates and service providers."

Determined to discover an insight into the needs and requirements of its clientele, and to deliver a level of service that is designed to meet, if not exceed, their expectations, **select-seychelles** looks forward to employing the optimum combination of resources throughout its operations to provide a truly memorable experience of the Seychelles Islands.
